P R E F A C E .

We have but a few words to say in a preface. The character of this work is easily judged by its title. While we do not claim to present a *perfect* Business Directory, we feel satisfied that this will be found to be as accurate as the nature of the work will admit of. Our Directory is made up from actual canvassing, and where errors may be found to occur, they most generally can be placed to the account of those furnishing the canvassers with information. Many parties, who contemplate removing, have refused to give their names, &c., preferring to have them left out altogether, than to appear and, after having removed, mis-direct the customer.

Our thanks are justly due to those whose advertisements appear herein, for the courteous manner in which our canvassers have been received, and it affords us a degree of pride to be able to refer to them as representing the leading houses in their several branches of business in this city, and can safely recommend them to the stranger customer.

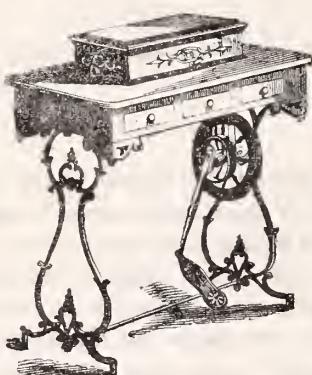

To the Merchants of the South and West, where a large portion of this work will be extensively circulated, we can conscientiously recommend those advertising in this book as being well worthy their patronage, and as being able to supply their demands on as good, if not better, terms than any other house north of Baltimore.

When names appear in bolder letters in the body of the book we wish to remind all that they are paid for, and those that were canvassed and did not pay to have them displayed thus, have but themselves to blame; we trust they will profit by the past and do likewise in the future.

As it is our intention to continue the publication of this *Business Directory* annually, we would respectfully ask of the business community a continuance of their patronage, so liberally bestowed upon this, our first edition.

SHRIVER'S CELEBRATED REMEDY FOR THE PREVENTION AND CURE OF BILIOUS DISEASES.

It includes all Diseases of a Bilious Nature, it cures all Bilious Complaints, from a slight attack to that of Bilious Fever, every form of Intermittent and Remittent Fevers, Chills and Fever, Ague and Fever, Dumb Agues, and all diseases that originate through Diseased Bile.

This medicine has been used for years in private practice, and its virtues have been so tested that it has far exceeded any remedy that has yet been before the public for the Prevention and Cure of the above named diseases. It has been faithfully tested and found to cure when every other medicine has failed, and is now confidently recommended to the public as the only safe and effectual remedy yet discovered for the freeing of Bile, and the greatest feature of this medicine is, beside the cure, that it can be taken by all, as it contains no Quinine, Arsenic, or Mercury, and is free from all Poisonous Ingredients, and while using the patient need not be confined to the house or restricted in diet. This remedy is not intended to check only, but it will certainly cure.

Persons who are subject to Chills and Fevers in the Spring and Autumn ought certainly to use this medicine, and by so doing they will never have a future attack.

TO ALL PERSONS USING STEAM BOILERS.

WOODRUFF'S PATENT ANTI-FRICTION

STEAM AND FIRE
REGULATOR,

FOR STEAM BOILERS,

PATENTED OCTOBER 23, 1855,

Made under and combined with Timothy Clark's Patent, dated August 21, 1847.

The wants of the public using Steam have for a long time called for a machine to answer the following purpose, which this Regulator is guaranteed to perform to the full satisfaction of all who may give it a trial.

It is of the utmost importance and advantage to all sizes of Boilers, in its perfectly controlling both the fire and steam by its extreme sensitiveness and durability, being constructed on a natural law, very simple, self-acting and anti-friction. It will save a very large per centage of the fuel by partially closing the damper and preventing the heat from passing through the chimney; will consume more of the gasses, and so regulate the draft of the fire that it will give just the amount of steam required, keeping it at that point, thereby preventing explosions, or any unnecessary strain on the boilers, or loss of steam through the safety-valve, and will also preserve the Boilers, Grate Bars and Furnace Fronts, by keeping the heat regular; will attend the Pamper in a better manner and more accurately than any Engineer possibly can, shou'd he devote his whole time and attention to it, and can be changed in an instant to keep the steam at any number of pounds required.

We refer to nearly all of the Editors in this city now using them, and all others having them in use, for the merits of this Regulator. For recommendations received from the U. S. Government and others, for the price of machines, &c., inquire of the Patentee,

JOSEPH WOODRUFF,

At the Baltimore Steam Boiler Works, Front St., near Lombard,
Or C. W. BENTLEY, Esq., Agent, at the same place.

Circulars or Pamphlets, with full description, will be sent by mail upon application.
N. B.—The public are hereby cautioned against infringing either of the above Letters Patent, granted by the Government of the United States. The original one, dated August 21st, 1847, is for an elastic vessel in combination with the steam and damper.

BALTIMORE FEMALE COLLEGE.

This Seminary of Learning, instituted for the liberal education of Young Ladies, was created a College proper by the Legislature of Maryland, December session, 1849, with authority to confer degrees, and endowed with all the rights and privileges of the most favored female institutions.

There are two departments in the Institution—the COLLEGIALE DEPARTMENT and the PREPARATORY DEPARTMENT, with their appropriate branches of learning. The course of study in each is three years, designated by as many different classes.

COURSE OF INSTRUCTION.

The course of instruction is intended to develop the intellectual, social and moral faculties; and by imparting a thorough, practical, accomplished and Christian education, fit the pupil for the faithful discharge of the responsible duties that await her in life.

Great pains will be taken to promote intellectual advancement, by rendering the acquisition of knowledge pleasant, and by training the pupil to correct habits of thought and reflection.

The proper exercise of the social feelings will be encouraged, by inculcating whatever belongs to refined manners and dignified courtesy in our intercourse with others; while reading, recitations and expositions from the Bible, will familiarize the mind with the truths of our holy religion, and imbue the heart with right principles of action, and rules for the government of life.

The situation is agreeable, in a retired and beautiful part of the city, and the buildings have been arranged with great judgment, and have study and recitation rooms separate, with every convenience for boarding and day pupils. Boarders reside with the family of the president, and are under his parental guardianship.

The accommodations for boarders have recently been increased, by the erection of an additional story on the main edifice, and a new building, 60 feet long and five stories high, with chemical hall, library, painting and reading rooms, bath rooms, &c.

The Institution takes rank with our oldest and best Seminaries, and enjoys a liberal patronage from the city of Baltimore, and from the Middle, Southern and Western States. The summer session will open April 15th, but pupils will be received at any time.
